Standard option : **WLHAIN**
Emergency option : **WLHAINE**

Microwave sensor option : **WLHAIM**
Emergency with sensor option : **WLHAIME**

Warmer light

Minimising blue light content is key to improving the survival and growth rates of nocturnal animals.

- **Set to 3000K as standard (CCT switchable)**
- **Low blue light content**
- **Eyelid option to reduce upward sky glow**

Functional & decorative

Designed to withstand the toughest of environments.

IK10

High impact protection and vandal resistant.

IP65

Total dust ingress protection and waterproof.

Microwave sensor option

Automatically switch the light **off** during daylight and when there is no presence to save energy.

Motion detection

Turns light on with movement.

Daylight switching

Holds light off during daylight hours.
