February **2023**

light your moment

**We believe in helping
people light their
moments sustainably**

By continuously pushing the boundaries of LED lighting technology. We design our products with people's experience at heart, to enhance everyday life, and build a better future. Every occasion matters, we don't make lights, we make moments.

An aerial photograph of a vast, dense forest of evergreen trees, likely spruce or fir, covering a hillside. The trees are tightly packed, creating a textured green surface. A semi-transparent teal and blue gradient overlay is positioned on the left side of the image, containing white text.

**We aim to
be carbon
neutral by
2030**

Build a better future

Sustainability is at the core of everything we do

Our commitment to tackle environmental challenges means we are pro-actively taking action to minimise the impact of our materials used and operations, to build towards carbon neutrality.

Silver medal EcoVadis

Methodology built on international sustainability standards, EcoVadis are the worlds largest and most trusted provider to rate our business and provide you with transparency on environmental, social and ethical performance - or sustainability.

Recycling

- 100% of cardboard waste is either used as shredded packaging filler or recycled.
- 100% of plastic waste is used in bales or recycled.
- 100% of our warehouse pallets are recycled.

Energy from renewable sources

100% of our electricity all comes from renewable energy sources such as solar and wind turbines.

Waste experts partnership

We partner with waste experts to enhance our overall environmental performance.

- 100% of waste is diverted from landfill.
- 96% of waste is recycled, with the remaining 4% being recovered as energy from waste.
- Consolidating waste pick ups to minimise our carbon footprint.
- Euro 6 standard for all waste pick up vehicles.

Greener packaging

Reduce, re-use & recycle

As packaging is the most produced item to a business outside of the products themselves, we know how important it is to do everything we can to minimise the impact it has on the environment.

100% recyclable

- Our boxes are made entirely from card to make them easy to recycle.
- No plastics used to make our boxes (including the finish of the box).
- Vegetable oil inks are used to ensure they are recyclable.

FSC approved card

The card used in our boxes comes from FSC approved forests. This means that the card used to make the box comes from a replenishable forest and for every tree used another one is planted.

Less wastage

We make sure our boxes are designed to use as little material as possible to minimise their carbon footprint.

Less ink

Our new brown box design uses significantly less ink than a full colour box with images. When producing the packaging this makes the carbon footprint much smaller.

Fast reliable service

We're here to help you succeed

We believe you have the ability to create amazing projects and we want to help you achieve it. We pride ourselves on always being readily available to provide a level of service that gets you what you need to excel and achieve unbelievable things.

**Place an order
before 3pm**

**Free next day direct
to site delivery**

Free on site support

On large scale projects a member of our technical support team will go to your site to help plan your installation to ensure you have a smooth installation.

Free on the phone support

Readily available and with expert knowledge of our product portfolio our technical support team are on hand to answer any question you have about our products.

Online support

To ensure you get the support you need 24 hours a day we offer online support.

- Detailed product information on our website.
- Email updates to keep you informed.
- Literature available on our website.
- Product configurators to help you make the right choice easily.

No substitute for quality

You can be confident with us

Since we were established in 1901 we have been driven to deliver nothing but the highest quality in everything we do. We offer longer warranties and get third party accreditation to ensure you can trust in our products as we do.

LIA accreditation

The Lighting Industry Association Quality Assurance scheme is a quality assurance scheme developed by industry experts. The scheme assesses the members quality system and product compliance, and supports the member in achieving and maintaining the standard expected for LIA membership. Collingwood have been awarded the LIAQA Assured Company mark.

EDA accreditation

The EDA (Electrical Distributors' Association) is the trade association that represents the interests of wholesale distributors of electro-technical products in the UK. Collingwood are a product affiliate and together we work for the good of the sector.

Long product warranties

You can trust in our products as we do. We offer long warranties on our products because we believe in our products. They all go through vigorous testing to ensure they are of the highest quality that will stand the test of time.

Two year on site warranty

With the majority of our commercial products we offer a two year on site warranty.

We test all
our products
in our own
**state of
the art lab**

What's new?

Take a look at all of our new additions

We continuously push our product portfolio to make sure you have the best possible lights for your installations, with an emphasis on quality of light and ease of installation.

Residential downlights

Residential downlights

Quick & easy installation

Easy-fit connector: Push-fit terminal connector

Our patented Easy-fit connector supplied with H2/H4 Lite designed to minimise installation time and ensures fitting the product is as easy as possible. The 2-part push-fit connector makes wiring to the mains a less time-consuming process. The light can also be easily attached and replaced by anyone.

Advantages

- Push-fit terminal connector makes it quick & easy to wire to the mains.
- First-fix connector is easy enough for an apprentice to connect the product.
- First-fix connector makes it incredibly easy to replace the fittings.
- Allows installer to carry out insulation resistance testing.

Features

- Piano key connector for ease of installation
- First-fix compatible
- Retro-fit compatible
- Less risk of damaging fittings and ceiling during installation
- No tools required for installation (when already attached to product)
- Loop-in loop-out
- 16A rated

CSP (Collingwood Switchable Product)

One light, three colour temperatures

Always have the correct product on hand. Our range of colour switchable downlights allows you to stock 3 colour temperatures in 1 product (2700K, 3000K & 4000K).

Advantages

- Simpler product range
- Products can be adjusted after they are installed

2700K

3000K

4000K

Use the CCT switch to choose the ideal colour for your installation.

Insulation coverable

Install the product directly under insulation

Many of our downlights are insulation coverable, suitable for both rolled and blown installation.

Advantages

- Quick & easy to install.
- No need to buy insulation protectors.

I-joint and metal web approved

Perfect for every installation

Our downlights have undergone vigorous testing to ensure they are perfect for use with I-joists, metal web and solid timber ceiling types.

LED Strip

LED Strip

Standard strip range

Our standard LED strip utilises constant voltage, making it the perfect solution for shorter distances as there will be no loss of light output up to 5m.

Choose from:

- 2 IP ratings (IP20 & IP44)
- 2 wattages (4.8W & 9.6W)
- 3 colour temperatures
- (2700K, 3000K and 4000K)
- Max run up to 5m
- Bespoke lengths, perfect for specific installations

50m reel packaging

We offer 50m reels of LED strip in an easy to dispense packaging. Simply pull out as much LED strip as the customer needs and cut at a cut-point.

We offer the 50m reel packaging with the following LED strip:

- LSV02 (IP20, 4.8W)
- LSV05 (IP20, 9.6W)

smart lighting

Making the ordinary extraordinary

Control it from your phone and switch it on/off automatically with our smart sensor

LSP strip

High Lumen output

LSP has a nearly unprecedented lumen output of approx. 2000lm/m. This allows you to use LSP as the primary light source in a room, and as it can easily be dimmed with the correct driver, gives you full flexibility to tailor the lighting to your current need.

238 chips per metre

With nearly twice as many LED chips as standard LED strip, LSP gives an incredibly even light, and will appear “dotless” in most profiles, avoiding unsightly spotting.

LSP

Standard

High efficacy

Up to 160 lumens per watt, LSP is our most efficient strip to date, and one of the best in the market. Fully compliant with the new BEIS legislation due to be introduced end of 2023.

Easy installation

The new LSK connector series gives an invisible and secure option to join and power LSP strip simply using a pair of pliers, avoiding the need to solder.

5 year guarantee

You can have peace of mind once LSP is installed, it will last.

Residential floodlights

Quick & easy installation bracket

Circular first fix bracket

The circular bracket is detachable and can be mounted to the surface before the rest of the product, allowing for a remarkably easy installation. The product is then simply bolted on to the bracket and the installation completed.

Advantages

- Quick & easy installation.
- This bracket is for first fixing onto the wall, and because it's circular, there is no need for spirit level.
- 360° rotation, allowing the floodlight to be installed in a variety of applications.
- Pre-wired with 1m cable.

360° rotatable and 180° tiltable

Flexibility and reliability

Combining 360° rotation and 180° tilt, this light can be pointed in any direction, ensuring you can illuminate a space from any position.

360° rotation

The product has a circular bracket at the end which allows it to be rotated in any direction. Once installed onto a wall, the light can be pointed in any direction with ease.

180° tiltable

The bracket directly attached to the floodlight allows the product to tilt both upwards and downwards.

Advantages

- Illuminate space from any direction.
- Can adjust into correct area after it's installed.

CCT switchable

One light, three colour temperatures

Our range of colour switchable floodlights allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 6500K).

Advantages

- Simpler product range.
- Products can be easily adjusted after they are installed thanks to a convenient IP65 switch on the back.
- Always have the correct product on hand.

3000K

4000K

6500K

IP65 directional PIR sensor

PIR sensor: Passive infrared sensor

The IP65 rating provides optimum protection against the impacts of rainwater and general adverse weather conditions. The PIR sensor can rotate, meaning that the activation can occur in a different area to where the floodlight illuminates. For example, the sensor could be pointed to a door so that when a person exits the building a separate walkway is illuminated, increasing safety.

Advantages

- IP65 rated sensor ideal for adverse weather conditions.
- Sensor rotates allowing the activation to occur in a different area to the illumination.
- Easily adjust motion sensitivity, lux levels and time required on the sensor.
- Save your customer energy and money.

Coastal protection

Rust & salt mist protection

With corrosion resistant protection and coastal protective paint, our floodlights are perfect for use in coastal areas.

Advantages

- Feel confident you can install these floodlights anywhere.
- Can be installed into coastal areas without any worry of products failing.

Panel accessories

Easily install panels anywhere

The surface mount frame is an ideal solution to mount panels in places without suspended ceiling grids, and where recessed mounting is not possible. The frame screws easily into the ceiling and the panel, driver and emergency pack will slide into the frame, with the remaining side screwed on to finalise the installation. The suspension kit allows the panel to be suspended from a ceiling, which is ideal for situations where recessed mounting is not possible. Installation is quick and easy – simply screw one end to the ceiling while the other side loops through the brackets supplied. The emergency pack turns your panel into an emergency version.

Use the tables below to choose the perfect kit for your installation

Commercial downlights

Adjustable cut-out size (CDL02 only)

Retro-fit downlights

Offers multiple cut outs from 120mm to 200mm, making it a truly versatile product.

Advantages

- Easily retro-fit into a multitude of ceiling cut-outs.
- Choose the ideal cut-out size for your installation.

Converter plate (Thea only)

Retro-fit downlights

Easily retro-fit your commercial downlight by using a converter plate. Simply place the downlight into the converter plate and the product will fill a hole Ø240-290mm.

Advantages

- Easily install downlights into ceilings with cut-outs too large for our products.

Bulkheads

Perimeter lighting & Halo light

Energy savings

Automatically switch the light **off** during daylight and when there is no presence to save energy.

Advantages

- Save energy
- Save money

Motion detection (Halo)

Turns light on with movement.

Daylight switching

Holds light off during daylight hours.

Warmer light

Minimising blue light content is key to improving the survival and growth rates of nocturnal animals.

Advantages

- Set to 3000K as standard (CCT switchable)
- Low blue light content
- Reduced upward sky glow

Complete exterior solution

Our range of anthracite grey building exterior lights designed to work perfectly together.

light

Bulkheads

CCT switchable: one light, three CCT temperatures

Our range of colour switchable bulkheads allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 6500K).

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

3000K

4000K

6500K

Lumen switchable: one light, two lumen outputs

Our range of lumen switchable bulkhead allows you to stock 2 lumen outputs in 1 product.

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

Lower output

Higher output

Quick & easy installation

All our bulkheads come with push-fit terminals for quick & easy installation.

Advantages

- Quick and easy to wire up.

The WL94 and WL95 come with push-fit terminals.

The WL94 comes with a removable twist and lock panel for easy access.

The WL94 comes with a detachable bracket for quick and easy installation.

Advantages

- Easier to install. Attach small bracket onto the wall and easily clip the bulkhead onto the bracket afterwards.

Simply push the quick release button to detach the bracket.

You can mount the bracket to the surface and then easily attach the bulkhead.

Battens

Battens

High efficacy & savings

Quick payback

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback

Energy rate £/kWh: £0.37	Typical T8 fluorescent lamp	Collingwood fitting
Average lamp life	12,000 hours	50,000 hours
Quality of fittings	100	100
Watts per fitting	72W (2 x 36W)	40W
Energy £/Year	£23,273	£12,929

Easy installation

Quick release button

The quick release buttons makes installation simple. Located on each end, and either side, they open up the batten to separate the diffuser and the gear tray from the base, with the hanging clips in place to ensure added convenience.

smart wireless

When you see this logo, we can offer a wireless control of the luminaire. Many features are available and our system is simple to install, easy to operate and will lower the energy consumption of your lighting to reduce electricity bills.

Please contact us for more information.

Emergency bolt-on

The bolt-on converts your batten to an emergency option.

Up to 6m high

Install as high as 6m high.

Quick attachment

Fast 4 minute conversion time.

Easy attachment

M20 interface for easy installation.

LiFePO4 with 2-year guarantee

Long lasting battery.

PIR bolt-on sensor

The sensor detects movement and allows the user to set up two step-dim parameter.

Up to 6m high

Install as high as 6m high.

Quick attachment

Fast 4 minute conversion time.

Easy attachment

M20 interface for easy installation.

On/Off PIR control & daylight switching

Save energy and money.

20mm Cable entry

There are conduit/cable gland entry points from either side and the back of the fixture, which enables this product to satisfy many installation requirements, giving the option to conceal wiring behind the fixture or link them together via their loop-in loop-out terminal.

Rear cable entry

Side cable entry

BESA mounting options

The battens can be mounted either directly on the surface, through the pre-drilled holes on the base of the fitting, or suspended via a hanging kit. The gear tray is can be removed entirely or it can be suspended from the base, whilst you work to mount.

Surface mounted

Suspended

Long-life LiFeP04 lithium battery

Greener & longer lasting

LiFeP04 are at the forefront of battery technology, with a smaller footprint than other battery types.

There is a long-life span, and can last up to ten times longer than traditional battery types. The battery recharge rate is quicker than traditional types too. The efficiency of these batteries extends into performance; charge and discharge, which can reach over 90%, which means very little energy is wasted.

Self-test vs. Manual test

Regular tests need to be conducted on the emergency fittings to ensure they are still performing correctly. The two tests which need to be conducted are for emergency light operation and the battery duration. There are two methods of conducting this test, a manual test and a self-test.

Manual test

A manual test can be performed locally by pressing the product test button that forces the emergency luminaire to go into emergency mode, or by switching off the mains.

The inspection is done in real-time, visually, by the operator in charge of the test.

Self-test

The self-test unit automatically performs numerous tests in the background. Any failure is indicated by the LED, that can start to blink or change its colour, depending on the product type.

The inspection is done by visually checking the LED indicator status.

The inspection frequency tests required are determined by EN 50172, which our products comply with. It should last as long as it is needed to make the emergency light source turn on, so in case of our products, only a few seconds.

The battery duration test should be performed at least yearly. It should last for the rated battery duration, so for manual test products, it has to be executed when there is a minimum risk for the occupants.

Maintained vs Non-maintained

Maintained

These are when the fittings are on all the time, like a normal luminaire. These are mains powered and have a battery backup, which keeps the lights on in the event of a power failure. For example, the emergency blade is maintained, so if for any reason there is a power failure the emergency blade will stay lit using the battery backup.

Non-maintained

These only turn on in the event of a power failure. There is a set duration that the light will be live for, which depends on the battery and product type. For instance, our escape route emergency luminaire light remains off and only turns on when the mains power goes down.

High bays

Springbok Lite

Economical high bay for fast return on investment

Energy savings

Payback as quick as 2 months

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback.

Springbok Lite	Replaces old HIT / HSE fittings	Replaces T5 fitting	Energy savings
200W	400W	2 x 80W	Saving up to 46%
150W	250W	4 x 49W	Saving up to 54%
80W	150W	2 x 80W	Saving up to 43%

Adding lighting control can save up to 82% of your existing energy usage.

Refractor accessories

Boost your light distribution by 20% with a decorative refractor.
Reduces glare to <UGR22.

HBL1REFR
For 80W product

HBL2REFR
For 100W product

HBL3REFR
For 200W product

Microwave sensors

For up to an additional 82% energy savings

For added control and energy savings use a microwave sensor kit.
Product code : **HBLMWS**

Motion sensor

Only turn your light on when movement is detected.

Daylight switching

Only turn your light **on** when there is not enough natural light.

Quick & easy installation

Kit includes a junction box for cabling and counter weight for balance.

Quick & easy installation

Pre-wired with 1.5m of H05RN-F cable for ease of installation.

IP65 & IK08

High impact resistance ensures that accidental collisions will not adversely effect the performance of the product. Combine this with high water and dust resistance and it means that the range of installation environments is vast.

Warranty

Long warranty for piece of mind.

**4 year
guarantee**

**2 year on-site
warranty**

Area Bay

Designed to perform, built to last
& connected to save energy

Best practice for energy & cost savings

Save energy & money on your project by following these 3 easy steps, and make savings like the example below.

1 Quality optics

Light the space using less fittings with our unique lens optic, designed to direct the light where it is needed.

Efficient lighting design

2 Motion detection

Use our **HBPIR** or **HBMWS** motion sensor to ensure your light is only on when a person is detected.

Save up to 60%

3 Daylight detection

Enable daylight switching, or if your zone is automated, daylight harvesting, to ensure your electric light works in sync with the natural light within the space.

Save up to an additional 22%

Energy rate £/kWh: £0.37	Existing fitting	1 Collingwood fitting	2 Collingwood fitting with motion sensor	3 Collingwood fitting with motion sensor and daylight detection
Average lamp life	12,000 hours	54,000 hours	54,000 hours	54,000 hours
Quantity of fittings	100	100	100	100
Watts per fitting	400W	150W	150W	150W
Energy £/Year	£106,649	£48,922	£19,569	£8,806
Energy savings £/Year	-	£57,727	£87,080	£97,843
Energy savings over 5 years	-	£288,635	£435,400	£489,215

Quality optics

To light a space efficiently, a luminaire optic must be designed to direct the light to where it is needed. Our unique lens optic changes the light distribution to create the perfect wide beam application.

Less fittings required providing energy and cost savings.

Motion sensors - Quick & easy installation

Save time on the installation ultimately savings costs on installation.

Quick tool-less connection

Tool-less, plug-in and twist sensors make installation quick & easy for you to adopt lighting control, even interchange your sensors should your floorspace be re-configured.

Takes under
3 seconds

Installation is
Tool-less

Simple & easy remote

Commission your Area Bay from the floor.

Hold Time: how long the light stays on after movement is no longer detected
Stand-by Dimming: what level the light should dim to after movement is no longer detected
Stand-by Period: how long after no movement is detected, does the luminaire wait until switching **off**
Detection Range: enables you to adjust the sensitivity of sensor
Daylight Threshold: set to only switch the light **on** when the natural light in the space is insufficient for the task

Step-Dim

Our sensor can signal the light to switch **off** when no motion is detected, or DIM down to a low level to avoid complete darkness and help safety.

DALI converter

DALI dimming

Make your high bay DALI dimmable using our IP67 rated converter.

Warranty

Long warranty for piece of mind.

**5 year
guarantee**

**2 year on-site
warranty**

Design guide

Which high bay is suited to your project?

Use the diagram below to choose your ideal high bay, or for a consultation on your requirements, contact our expert team today. The designers inside The Studio at Collingwood are able to offer expertise throughout the lighting design process, putting together full schemes based around our comprehensive product range. Detailed client consultation ensures a high quality and tailored service.

Springbok Lite - Open goods storage

Use the diagram below for open goods storage areas (**200lux is ideal**).

Low bays

Low bays

High efficacy & savings

Quick payback

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback

Energy rate £/kWh: £0.37	Existing fitting	Collingwood fitting
Average lamp life	12,000 hours	50,000 hours
Quality of fittings	100	100
Watts per fitting	400W	150W
Energy £/Year	£129,293	£48,485

Beam angles

Symmetric vs asymmetric

Offering three different beam angles, the Lentus low bay can be used for general lighting or aisles.

120°
general lighting
(circular output)

90°
general lighting
(circular output)

50°x90°
aisle lighting
(rectangular output)

PIR bolt-on sensor

The sensor detects movement and allows the user to set up two step-dim parameter.

Up to 6m high

Install as high as 6m high.

Quick attachment

Fast 4 minute conversion time.

Easy attachment

M20 interface for easy installation.

On/Off PIR control & daylight switching

Save energy and money.

Easy installation

The low bay has been designed to be as easy as possible to install and maintain.

Lightweight

With its unique and skilful design, the Lentus low bay is extremely lightweight, allowing easy installation and maintenance whilst providing high lumen output.

Aisle spaces

50x90 lens optics provide a rectangular light distribution that is ideal for 3-5m racking aisles.

Compact

Smaller in size, so it can be installed by an individual.

Dimming

1-10V

As standard, the Lentus low bays offer 1-10V dimming technology in a single driver, providing flexibility of control.

DALI converter

DALI dimming

Make your low bay DALI dimmable using our IP67 rated converter.

Flicker free

Lighting that's good for the soul

In line with Collingwood values, the best electrical components have been included in the product design. This has resulted in our confidence to assert that the low bays are flicker free fittings.

Having flicker free low bays, results in a more comfortable working environment, and increases employee satisfaction, safety and productivity.

Industrial floodlights

Easy installation

Tool free access

The skilfully designed bracket simplifies the floodlight installation, cutting down costs and time, by allowing tool free access to the fixing screws.

Angle stamped bracket

The floodlights have additional features included such as the mounting angles, which are stamped on the adjustable bracket for precise angles, along with star washers so the bracket can stay in the same position once angled.

1m cable

Installing the K2 floodlights couldn't be easier with a 1m of cable included for ease of installation, in line with Collingwood's demand for high quality, a nickel plated cable gland is included.

Daylight savings

Photocell kit accessory

Outdoor photocell (Dusk to Dawn) sensor kit for use with all outdoor luminaires to keep the lights **off** when it is daylight outside.

Floodlight	Floodlights per photocell
100W	2
150W	2
200W	Not compatible

Flicker free

Lighting that's good for the soul

In line with Collingwood values, the best electrical components have been included in the product design. This has resulted in our confidence to assert that the floodlights are flicker free fittings. Having flicker free floodlights, results in better visual comfort, and ensures a crisp image along side CCTV cameras.

Windage factors

Built for the toughest of environments

The windage factor for our range of K2 floodlights are as follows:

100W (4kg) 1.1 sq.m
150W (5kg) 1.12 sq.m
200W (5.6kg) 1.15 sq.m

IP65 & IK08

Built for the toughest of environments

Durable and versatile, the K2 floodlights are IP65 rated and are suitable for outdoors, whether it is for a large warehouse, loading bays, or car parks.

The breather vent maintains the IP65 rating and prevents condensation. This prevents product losing output or product failure.

Beam angles

Symmetric vs Asymmetric

Symmetric

Symmetric beam angle provides light in a conic shape, illuminating the surface in all directions, from the centre to all sides, as the lens pushes the light equally in all directions.

Asymmetric

Asymmetric beam angles concentrate light where it is needed by using reflectors to direct light in front of the fixture and minimising light spill.

Anti- corrosives

High efficacy & savings

Quick payback

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback

Energy rate £/kWh: £0.37	Typical T8 fluorescent lamp	Collingwood fitting
Average lamp life	12,000 hours	50,000 hours
Quality of fittings	100	100
Watts per fitting	2 x 36W	35W
Energy £/Year	£23,273	£12,929

IP65 & IK08

Built for the toughest of environments

High impact resistance ensures that accidental collisions will not adversely effect the performance of the product. Combine this with high water and dust resistance and it means that the range of installation environments is vast.

Dimmable

DALI-2 & 0-10V dedicated product codes available

DALI-2 is the latest protocol, meaning these units are up-to-date for the latest requirements. DALI offers complete control of the lighting in your spaces, enabling you to control and monitor each fixture individually.

This is ideal for large, multi-purpose spaces that require differing light levels or regular changes to the layout.

Emergency options

The complete solution

Essential for many industrial spaces, it is vital to keep the area illuminated in the event of an emergency or loss of power. That's why we have an emergency version available for all three operating options; standard, microwave sensor and DALI.

The emergency versions will remain illuminated for a minimum of three hours and their convenient self-test feature will ensure that any failings will be clearly evident via the internal indicator light.

Cable entry

Cable entry points from either side and the back of the fixture enables this product to satisfy many installation requirements, giving the option to conceal wiring behind the fixture or link them together via their loop-in loop-out terminal. Two compression cable glands are supplied as standard to help maintain the IP65 rating whilst reducing tension on the cables.

Rear cable entry

Side cable entry

Microwave sensors

Motion detection sensor

Perfect for car parks, the sensor will ensure these fixtures are only on when motion is detected, and allow the flexibility to adjust the detection area and hold time.

Advantages

- Save your customer energy and money
- More efficiently light your area

Mounting options

Our anti-corrosives offer versatility with several mounting and wiring options. Stainless steel mounting brackets and hanging brackets are supplied with each fixture, so the anti-corrosives can be surface mounted directly onto the ceiling, or they can be suspended if the location has a high ceiling. BESA fixing kit available.

Anti-corrosives

 CCT switchable between 3000K, 4000K & 6500K

 Grade 316 Coastal protection kit available

 BESA mounting kit available

Guarantee	5 years, 2 years on battery, 2 years on-site
Wattage	50W
IP rating	IP65
IK rating	IK08
Dimmable	DALI-2 and 0-10V Dimmable
Input	220-240V 50/60Hz
LED lifetime	50,000h L70
Emergency version available	Yes
Install connector type	Loop in / Loop out
Ambient temperature	-20°C to +40°C
Building regulations	Part P
Electric class	1

Recessed

Domino

Differentiate your space. Lumen switchable ultra-low glare architectural panel designed for office, education and retail applications.

Pendant

Nova

Wide light emitting surface designed for superior optical control and comfortable light. 450mm, 600mm and 900mm available in Black-Gold and White-Gold, suitable to be a centerpiece to any room.

Surface

Astra

Classic shape luminaire with timeless design gives a floating impression when surface mounted. Available in 450mm and two lumen outputs, suitable also to be wall mounted.

Linear

Uniform

Market leading efficacy of 150 Llm/W with outstanding uniform lit effect, our new IP44 rated product features a lumen output switch to enable you to meet various lux levels within a project using the same luminaire.

Downlight

Thea Pro

UGR19 functional downlight that is also IP65 and suitable for a wide range of applications. This highly efficient downlight is also available to be surface mounted using an accessory.

Feature Light

Qubo

Architectural new projector light that can be used indoor or out. Supplied as standard with wall bracket and spike for installation to floor or ground. Qubo features precision degree markers that can tilt up to 120° and rotate 60°.

New in 2023

Ground light

GL019

Discreet yet powerful, our IP68 rated ground lights are perfect for outdoor and indoor use. Available in ultra-low glare through to frosted. Their small size makes them perfect for accent lighting.

Spike light

SL220

Stylish and versatile. With a 90° vertical and horizontal tilt, spike lights bring outdoor features and spaces to life. Available in four colour finishes, IP65 rated, these low energy lights can be adjusted as your garden grows.

Marker light

GL100 & GL200

Perfect for paths and steps, these hardwearing, domed lights are constructed of hardwearing marine grade stainless steel and come with a 7-year warranty.

Hooded light

GL034

For steps, wall or ground lighting, hooded design directs light across the surface and reduces glare. This straight to mains fixture is built to last, from marine grade stainless steel and comes with a 7-year warranty.

Rotatable spot

UL030 & UL010

A stylish swivel mounted outdoor light. Engineered to last with a 70,000hr life span and IP68 rated, this fully submersible light is the ideal way to bring your pond, swimming pool or landscape to life.

LED line

Wall washer

Ideal for highlighting architectural features, our asymmetric LED line washes a wall the front of your property with light whilst minimising light spill. Colour changing available.

1901

Design your light
Configure your solution in seconds

Over a century of design, expertise and innovation in lighting. The 1901 collection is elegantly understated, and yet infinitely customisable. Emitting an unparalleled quality of light, these LED luminaires add radiance to a room, whilst enhancing the purity of the natural colours.

Each downlight, spot light and pendant are custom built and hand finished to your specification. This design versatility, creates a limitless collection to complement each space. A uniform and stylish look, with layers of light that flow seamlessly throughout a room, or the entire property.

Your lighting scheme, your way, without compromise.
